## EDUCATION

### Rajiv Gandhi Institute of Technology

*Bachelor of Engineering in Information Technology | CGPA-9.75*

Andheri, Mumbai

Nov. 2021 – May 2025

### St. Peter College of Science

*Higher Secondary Schooling*

Vasai, Mumbai

Aug. 2019 – May 2021

## EXPERIENCE

### Software Developer Intern

*Digitrix Agency*

August 2024 – November 2024

Vasai, Mumbai

- Worked closely with cross-functional teams to deliver features on time.
- Conducted testing and debugging to enhance the reliability of the web application.
- Designed and implemented RESTful APIs for seamless backend and frontend communication.

## PROJECTS

### Workflow Automation Platform | *Next.js, Turborepo, Prisma ORM, TypeScript, Express.js*

September 2024

- Designed and developed an automation platform inspired by Zapier, enabling users to trigger and execute actions based on webhooks.
- Enabled automated workflows triggered by incoming webhooks, starting the execution of predefined actions.
- Seamless handling of triggers and actions for integrating various services, offering scalability and flexibility for complex automation.

### Medium Blogging Website | *React.js, Cloudflare Workers, Prisma ORM, Tailwind CSS, TypeScript*

March 2024

- Used a serverless architecture for backend deployment which can auto-scale as per the no. of requests and used vercel for frontend deployment.
- Utilized modern React.js patterns with functional components and hooks.
- Integrated functionalities such as skeleton loading, JWT authentication and database migration.

### Makeit - A token launchpad | *React, Solana Wallet Adapter, Web3.js, Tailwind CSS*

December 2024

- Designed and developed an advanced token launchpad on the Solana blockchain, streamlining token creation with seamless metadata and image integration.
- Enabled users to upload token metadata and images directly from their local machines, stored securely on IPFS for decentralized accessibility.
- Simplified token deployment for non-technical users, reducing deployment time by up to **40%** compared to traditional platforms.
- Among the top **5%** of Solana-based launchpads offering integrated IPFS storage and Token-22 compatibility.

## TECHNICAL SKILLS

**Languages:** Java, Python, C, SQL, JavaScript, HTML/CSS, Typescript, Solidity

**Frameworks:** React, Next.js, Node.js, Express.js, Flask, Tailwind CSS, Bootstrap, GraphQL

**Developer Tools:** Git, Docker, Google Cloud Platform, VS Code, Visual Studio, PyCharm, IntelliJ, Postman, Remix

**Libraries:** pandas, NumPy, Matplotlib, scikit-learn, web3.js

**Build Systems:** Turborepo

**Databases:** Prisma, PostgreSQL, MySQL, MongoDB

**Cloud Platforms:** AWS, GCP, Cloudflare

**Soft Skills:** Communication, Time Management, Teamwork, Critical Thinking

## CERTIFICATIONS & TRAINING

**The Complete 2024 Web Development Bootcamp** | *Full-Stack Development, Web Development*

**AWS Cloud Technical Essentials** | *Cloud Computing*

**Foundations of Cybersecurity** | *Information Security, Cybersecurity*

**Postman API Fundamentals Student Expert** | *Application Programming Interfaces (API)*

**Play It Safe: Manage Security Risks** | *Security Audits*
